

**DID YOU KNOW** that **ONE** fume hood, if left open, uses the same amount of energy as **3.5 houses** a year?

Keep your fume hood closed when not in use & win a **WINE & CHEESE Party** for your floor!

The contest will run from **March 5- 25** in **NRB**

**SAVE ENERGY. BE SAFE.**

**SHUT THE SASH**

This contest is a fun incentive to encourage lab users to **shut the sash** on the fume hoods, which could save up to \$55,000 in wasted energy use per year in NRB alone and is always safer for lab occupants.
